-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Terminal Disclaimer***

1. The terminal disclaimer filed on 9/1/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,663,937 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Claim Rejections - 35 USC § 112***

2. Claims 24 and 25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the original disclosure for the phrases "a width which ... each slot" (claim 24) and "a width which ... each slot" (claim 25). The drawings show flow-through openings which are smaller in width than the slots, but the disclosure does not support the claimed ranges of flow-through opening sizes.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 5-8, 11-15 and 18-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kessler et al ('399). The reference discloses a floor mat having a plurality of flow-through openings intermediate a plurality of slots and carpet strips in some of the slots, said carpet strips being removable; see Figure 1 and column 2, lines 19-58. The carpet strips may be in every third slot to allow water to drain through the mat (see column 2, lines 61-66), which results in a plurality of flow-through openings intermediate each adjacent pair of slots. It would have been obvious to one of ordinary skill in the art to vary the cross-sectional configuration of the flow-through openings from that of the slots holding the carpet strips in the article of the reference, i.e. make the openings larger or smaller than the slots, depending on the desired amount of flow-through drainage in the mat for a particular end use.
5. Claims 4, 9 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kessler et al as applied to claims 1-3, 5-8, 11-15 and 18-29 above, and further in view of Yamamoto et al ('925). The secondary reference discloses the use of hook and loop fasteners to removably attach a carpet strip to a mat; see Figure 3 and column 3, lines 12-19. The primary reference suggests the use of any suitable means to attach the strips to the mat, for example, the use of adhesive or mechanical means; see page 5, lines 9-13. It would have been obvious to one of ordinary skill in the art to use hook/loop fasteners as an attaching means to adhere the carpet strips to the slots in the article of the primary reference in view of the suggestion at column 1, lines 21-45 and the Abstract of Yamamoto et al.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
